RUBRIC: Virtual Machine Setup (Ubuntu Desktop)

Activity: Create, Configure, and Install Ubuntu Desktop on a Virtual Machine

Total Points: 100

Criteria	Excellent (100%)	Proficient (75%)	Developing (50%)	Incomplete (0%)	Score
VM Type & Version (10 pts)	Correctly selects Ubuntu (64-bit) as the OS type and version. Matches the downloaded ISO architecture.	Selects correct type but wrong version (e.g., 32-bit instead of 64-bit) — VM still works.	Selects wrong OS type entirely (e.g., "Other Linux") — needs correction.	Fails to select any valid OS type; cannot proceed.	/10
Memory (RAM) Allocation (15 pts)	Allocates 4-8GB RAM as required. Understands the host system limitation.	Allocates 3GB – 3.5GB (sufficient but slightly below requirement).	Allocates 2GB or less — causes severe lag or installation failure.	Allocates no RAM or invalid value.	/15
Processor (CPU) Allocation (15 pts)	Allocates 4 CPU cores with 100% execution cap. Enables PAE/NX if available.	Allocates 2 cores but does not adjust execution cap or nested VT x settings.	Allocates only 1 core — installation takes extremely long.	Fails to configure processor settings.	/15

Hard Drive (Storage) Setup (20 pts)	Allocates 100 GB dynamically allocated storage (or fixed). Created a partitioning in drive.	Allocates 25GB but chooses wrong disk format (e.g., VHD) — still functional.	Allocates less than 20GB — insufficient for installation.	No hard drive created; VM cannot boot.	/20
ISO Attachment & Boot Order (15 pts)	Correctly attaches the Ubuntu Desktop ISO to the optical drive. Sets boot	Attaches ISO but forgets to adjust boot order — manually boots	Attaches ISO but boot order wrong — VM boots to blank screen.	Fails to attach ISO; VM cannot install.	/15

	order: Optical → Hard Disk .	via "Force BIOS" first time.			
Proper Installation Execution (25 pts)	Completes full installation: partitioning ("Erase disk"), user setup, timezone, keyboard. No errors. Reboots successfully into GUI.	Completes installation but makes minor errors (e.g., wrong timezone — fixes later).	Installation starts but fails midway (partitioning error, corrupt ISO, or power loss).	Installation not attempted or aborted.	/25

TOTAL SCORE: ____ / 100
DOCUMENTATION REQUIREMENT

Student Name: Keith Jared C. Romasanta

Date: August 26, 2026

VM Name: RomasantaElective3

1. VM Specifications Summary

Component Allocated Value

VM Type / OS Ubuntu (64-bit)

RAM **4** GB (**4096** MB) CPU Cores **4**

Hard Drive Size **100** GB (Dynamic / Fixed) Storage Controller

SATA / SCSI

Network Adapter NAT / Bridged

ISO File Used c:\Users\COLLEGE STUDENT\Downloads\ubuntu-26.04-desktop-amd64.iso

2. Step-by-Step Setup Process

(Describe what you did, in order. Include commands used, if any.)

1. Opened Oracle VM VirtualBox.
2. Created a new virtual machine named RomasantaElective3.
3. Selected the Ubuntu desktop ISO image and adjusted the VM settings.
4. Assigned 4096 MB base memory, 4 CPUs, and a 100 GB hard drive.
5. Clicked Finish once done and waited for the VM to start.
6. Proceeded with Ubuntu installation.
7. Completed account and location details, then reviewed all configuration options.

8. Finalized the Ubuntu installation.
9. Opened the Terminal window and captured a screenshot.

3. Issues Encountered & Resolutions

(List any problems during setup and how you fixed them.)

Issue:	Solution:

4. Verification Screenshots

(Paste screenshots here or attach separately)

- VM Settings (Memory, CPU, Storage)

Create Virtual Machine

Hardware

You can modify virtual machine's hardware by changing amount of RAM and virtual CPU count. Enabling EFI is also possible.

Base Memory:

4096 MB

4 MB

16384 MB

Processors:

4

1 CPU

12 CPUs

☐ Enable EFI (special OSes only)

Create Virtual Machine

Virtual Hard disk

If you wish you can add a virtual hard disk to the new machine. You can either create a new hard disk file or select an existing one. Alternatively you can create a virtual machine without a virtual hard disk.

☒ Create a Virtual Hard Disk Now

Disk Size:

100.00 GB

4.00 MB

2.00 TB

☐ Pre-allocate Full Size

☐ Use an Existing Virtual Hard Disk File

Empty

☐ Do Not Add a Virtual Hard Disk
